

Composite Door Bolts 859 TYPE 3

Product by 

Operation

Function 1 – Solid Spindle

Locking inside/outside

Lift lever engages hook bolts into plates, single turn of key throws deadbolt and locks the mechanism, lever returns to horizontal position.

Unlocking inside/outside

Single turn of key retracts deadbolt, depress lever disengages hook bolts and retracts latch, lever returns to horizontal position.

Function 2 – Split Spindle

Locking inside

Lift lever engages hook bolts into plates, single turn of key throws deadbolt and locks the mechanism, lever returns to horizontal position.

Locking outside.

When closed the door is retained on day latch which is released by key only.

Lift lever/pad engages hook bolts into plates, single turn of key throws deadbolt and locks the mechanism, lever/pad returns to horizontal position.

Unlocking inside.

Single turn of key retracts deadbolt, depress lever disengages hook bolts and retracts latch, lever returns to horizontal position.

Unlocking outside

Single turn of key retracts deadbolt, depress lever/pad disengages hook bolts, lever/pad returns to horizontal position.

Further quarter turn of key retracts day latch.
